About the University

Sharda university has over the years become one of the leading centre of the education, research and innovation in Delhi NCR region established through an act of state legislature of Uttar Pradesh (14, 2009), Sharda University offers over 216 UGC recognized Programmes/ Plans in various disciplines. It is a part of the renowned Sharda group with operations in area like education, health care and IT. and recently graded as A+ by NAAC.

Being the only global university in India that has seen students from 85+ Countries experienced world class faculties and having 250+ global academic partnerships, Sharda University offers a truly international learning environment. That's why it says "The World is here, where are you?"

The Sharda School of Nursing Science and Research was established in 2008 to train young students as dedicated professional nurses, capable of contributing effectively towards the growing health demands of the health sector. The college has a state of art, supportive learning environment with good clinical and library facilities, which attracts National and International students. Regular co-curricular and extracurricular activities are planned meticulously and organized by group of highly motivated faculty. Students have access to medical facilities within the campus as university has a world class 1200+ bedded NABH accredited multispecialty hospital with all modern medical facilities. Sharda University is currently established a 550 bedded hospital in Nigeria equipped with the all modern facilities and sophisticated equipment to provide comprehensive health care to all sectors of the society, and established university in Uzbekistan.

About the Topic

According to the World Health Organization, an estimated 800 women die each day from preventable pregnancy and delivery-related causes. Ninety-nine percent of maternal deaths occur in developing countries. There are a number of factors limiting access to the high-quality care that would reduce this mortality to a more acceptable level; these include limited family resources, living far from a health care facility, and the lack of a reliable system of transportation. Timing is critical in preventing maternal death and disability. New-born care consists of evaluation for the need of resuscitation, a complete physical exam, administration of prophylactic medications and vaccines, adequate feedings, safe sleep, hygiene of the new-born, and other important areas for baby wellbeing.

Objectives

At the end of training students will be able:

- To learn hands-on training on management of various obstetrical and child health emergencies.
- To demonstrate proficiency in conducting prenatal examinations, including assessing maternal health status, fetal growth and well-being.
- To reflect on improving the standard of care provided to mothers during conduction of normal delivery and newborn babies.
- To elicit and perform essential skills for newborn nursing care and control of infections during hospitalization.
- To reinforce learning in maternal/ child health nursing evidence based practices and related technological advancements.

Chief Patrons

Shri. P.K. Gupta
Hon. Chancellor, Sharda University

Shri. Y.K. Gupta
Hon. Pro-Chancellor, Sharda University

Patrons
