## ABOUT THE TOPIC

The OSCE is a structured, hands-on clinical examination designed to assess essential clinical skills in obstetrics and gynaecology through a series of timed stations. Students will demonstrate their competencies in communication, physical examination, procedural techniques, and clinical decision-making.

The examination replicates real-life clinical scenarios using standardized patients and mannequins to ensure uniformity and fairness in evaluation. In Obstetrics and Gynecology (OBG) Nursing, clinical skills are essential for providing safe and effective care to women throughout their reproductive life cycle, including pregnancy, labor, childbirth, postpartum, and gynecological care. This initiative aims to prepare nursing students for real-world maternal and reproductive healthcare challenges

## OBJECTIVES

By the end of the event, participants will:

- To assess students' clinical competencies in obstetric and gynaecologic procedures.
- To reinforce practical skills essential for safe maternal and newborn care.
- To promote application of theoretical knowledge in clinical scenarios.
- To develop professional communication and patient interaction skills.
- To provide formative feedback to enhance learning and skill development
